## Profile Summary

**Senior Data Engineer** with 8+ years of experience in designing and optimising large-scale **batch and streaming data pipelines** on Google Cloud Platform. Specialized in real-time data processing using Apache Beam, Dataflow, Kafka, and Pub/Sub. Proven expertise in building scalable, high-performance solutions with Apache Spark, BigQuery, and GCP services to drive business insights and operational efficiency. Passionate about delivering robust data architectures for both real-time analytics and batch ETL workloads.

---

## Technical Skills

- **Programming:** Java, Python, Scala, SQL, Shell Scripting
  - **Big Data Technologies:** Apache Beam, Spark, Hadoop, Kafka, Pub/Sub
  - **Cloud Platforms:** Google Cloud Platform (GCP), AWS
  - **Databases:** BigQuery, SQL/NoSQL Databases
  - **Data Engineering Tools:** Dataflow, Airflow, Dataproc
  - **Other:** Spring Boot, CI/CD for Data Pipelines, Data Ingestion & Transformation, Terraform
- 

## Professional Experience

Senior Data Engineer

Sabre Travel Technologies | Bangalore, India | July 2016 – Present

- **Designed and developed** scalable data pipelines using Apache Beam and Dataflow, reducing data processing time by **40%**.
  - **Implemented** ETL solutions to ingest and transform JSON/XML data from multiple sources (Pub/Sub, BigQuery, GCS, Kafka) into structured formats for analytics.
  - **Developed** a real-time streaming data processing system using Kafka and BigQuery, improving ticketing system efficiency by **30%**.
  - **Optimized** Spark-based batch processing jobs, reducing execution time by **50%** and improving resource utilization.
  - **Automated** data pipeline deployments using CI/CD, reducing manual intervention and ensuring seamless updates.
  - **Collaborated** with cross-functional teams to design cloud-native data architectures, enhancing system scalability and reliability.
-

## Key Projects

### Offer and Order Transformation (Nov 2024 – Present)

**Technologies:** Java, Python, Apache Beam, SQL, BigQuery, GCP, Airflow, Composer

✅ **Problem:** Delay in processing the Offer and Order data affects the customers to provide the flight booking offers to the users.

✅ **Solution:** Built a Dataflow pipeline to process and update Order and Offer data.

✅ **Impact:** Reduced processing time by **35%**, ensuring near real-time updates.

### Flight Schedule Transformation (Jan 2024 – Dec 2024)

**Technologies:** Java, Python, Apache Beam, SQL, BigQuery, GCP, Airflow, Composer

✅ **Problem:** Inefficient data processing pipelines are causing delays in flight schedule updates.

✅ **Solution:** Built a Dataflow pipeline to process and update flight schedule data efficiently.

✅ **Impact:** Reduced processing time by **35%**, ensuring near real-time updates.

### DW-AIR (Feb 2024 – May 2024)

**Technologies:** Spring Boot, Pub/Sub, Java, GCP, Airflow, Composer

✅ **Problem:** Need for a scalable messaging system to handle airline data ingestion.

✅ **Solution:** Developed a Spring Boot application that reads HTTP messages and writes them to a Pub/Sub topic.

✅ **Impact:** Improved data availability and reduced data loss by **25%**.

### Ticketing Transformation (Apr 2021 – Nov 2023)

**Technologies:** Java, Apache Beam, Python, SQL, BigQuery, GCP, Airflow, Composer, Pub/Sub

✅ **Problem:** Delayed ticket processing is affecting customer experience.

✅ **Solution:** Designed and deployed an Apache Beam pipeline on Dataflow to process ticketing data from GCS and write to BigQuery.

✅ **Impact:** Enhanced data availability, reducing ticket processing delays by **40%**.

### Payment Transformation (Aug 2019 – Nov 2020)

**Technologies:** Apache Spark, Java, Shell Script

✅ **Problem:** Inefficient batch processing for payment records stored in Avro format.

✅ **Solution:** Built a Spark application to transform Avro files into Parquet, improving query performance.

✅ **Impact:** Reduced processing time by **50%**, optimizing payment data storage.

---

## Education

**B.Tech in Computer Science & Engineering**

Christ University, Bangalore (Aug 2012 – Jul 2016)

---

## Certifications & Achievements

- Google Cloud Fundamentals: Core Infrastructure
  - Exploring and Preparing Your Data with BigQuery
- 

## Additional Information

- **Languages:** English, Hindi
- **Availability:** Open to relocation and remote work
